Re: Larchmont Temple
Park Avenue Synagogue

Dear Setrak,

As an architect, I am always hoping that we can find craftsmen who can translate our drawings into objects, which are even better than we had imagined during the design process. We have found that team in International Creative Metal.

The bronze work you did for us at the Larchmont Temple now and Park Avenue Synagogue before is superb; the craftsmanship is without parallel. Your attention to detail and skill in problem solving is backed with an enthusiastic desire to create objects, which evoke the spiritual. For both projects your work has been a source of joy and inspiration to the thousands of people who worship in them.

On behalf of all of them and our staff,

Very truly,

Henry Stolzman

I say thank you. yours,
