Mr. Setrak Agonian
International Creative Metals
37-28 61st Street Woodside,
MY 11377

Dear Mr. Agonian,

Skidmore, Owings & Merrill would like to extend to you our most sincere appreciation and compliments on the ornamental bronze work that you completed in the lobby of 230 Park Avenue, formerly the New York Central Building.

As you know, the New York Central Building is a most distinguished historic landmark building. The execution of our design required the utmost in quality ornamental metal fabrication including the fabrication of bronze castings and extrusions into grilles and entrances. Your fine work met these exacting criteria and recreated, in seamless fashion, the fine original detailing that occurs throughout the building.

We would truly welcome the opportunity to work with you again.

Sincerely,

Skidmore, Owings & Merrill LLP
